ABOUT ME

I'm a software developer driven to build high-impact products and be part of teams that push the limits of what's possible. I thrive in challenging environments where I can take ownership, deliver real value, and continuously level up my skills.

I've worked across projects of different scales, from early-stage initiatives to more complex systems, consistently focusing on scalable, high-quality solutions. I prioritize user-centric thinking and strong design principles, while keeping performance and maintainability at the core of everything I build.

EXPERIENCE

Fullstack Developer

Amalgama

Argentina

2025-2026

- Worked as a software developer within the TightFit project, a system designed to allow gyms to quickly schedule classes in newly available time slots.
- Contributed to the development of a scalable and responsive solution using **TypeScript, Angular, Firebase, Google Cloud Platform (GCP) and Flutter**, collaborating closely with the team to deliver a reliable and user-friendly product.

Back End Developer

Bitbug

Argentina

2024-2025

- Led the backend development for an AI project from inception, designing a comprehensive architecture using AWS services including **Lambda, S3, API Gateway, Step Functions**, and **DynamoDB**, with **Python** as the primary language.
- Played a critical role in gathering and analyzing customer requirements, translating them into a scalable, efficient backend infrastructure. This involved ensuring high availability, data security, and seamless integration across all AWS components to support a reliable end-to-end AI solution.
- Also worked in a project using **Node.js, Nextjs** and **GCP**.

Fullstack Developer

TDI

Argentina

2023-2024

- In my first experience as a developer I worked on two different projects, using **PHP, JS, mySql and html**.
- Developed specialized software for the Tax Collection Agency of Rio Negro, creating backend processes to manage taxpayer data efficiently and implementing a frontend interface for user accessibility. This project enhanced the agency's tax processing workflows, allowing for smoother data management and faster service.
- Designed and developed a responsive website for Barceló University, creating an intuitive user experience to showcase academic programs, faculty profiles, and student resources.

Functional Analyst

UTN

Argentina

2022-2023

SKILLS

Skills: Javascript, react, react native, SQL, html, angular, AWS, GCP.

Languages: Englis, Italian.

EDUCATION

UTN, Argentina

Software Engineering
